KAMAL RAJ G

FULL STACK DEVELOPER

9600088615 | kamalraj9305@gmail.com | Kodungaiyur, Chennai, Tamil Nadu

SUMMARY

A major component of my recent expertise has been developing and managing online apps, where I have worked to create solutions that are both efficient and easy to use. I have created responsive interfaces, overseen backend processes, and made sure that all components integrate seamlessly. I enjoy taking on new challenges and developing my abilities to produce significant outcomes.

TECHNICAL SKILLS

ReactJS	*Django*	PostgreSQL	*NextJS*
Core Java	Front-End-Development	*Linux*	PHP

WORK EXPERIENCE

INTERN PRODUCT DEVELOPER (August 2024 - Present)
Whizz Cybersecurity,
Chennai

- Significantly contributed to a cybersecurity compliance solution, a dynamic product designed to provide user access and functionality tailored to specific requirements.
- Played a crucial role in developing and integrating two or more independent modules within the product, ensuring seamless performance and scalability.
- Specialized in backend development using Django, with a focus on designing and managing API endpoints and handling module data values for efficient data processing and interaction.
- Used PostgreSQL for database management, efficiently designing and optimizing complex SQL queries to meet dynamic data requirements.
- Ensured proper routing and processing of API URLs and implemented secure and reliable endpoints for seamless frontend-backend communication.
- In close cooperation with the team for tasks with high priority and constantly provides quality results with tight deadlines.
- Conservation and positive feedback for technical contributions, skills for problem solving and a proactive approach for difficult tasks.
- Development of knowledge specialized in the creation of evolutionary and modular web solutions that correspond to the needs of users and the best cybersecurity practices.
